Nodes

You did not buy a computer. You bought a new node in an existing identity graph. Somewhere between public information, commercial records, and scraped databases, a person becomes a dossier.

FINANCE

EQUIFAX

TransUnion^{tu}

innovis

Payload: Credit-related information,
debt records, financial signals,
risk profiles.

MARKETERS

acxiom

LiveRamp

Payload: Purchasing behavior,
household demographics, lifestyle
tags, consumer characteristics.

PUBLIC DIRECTORIES

SPOKEO

BeenVerified

whitepages

INTELIUS

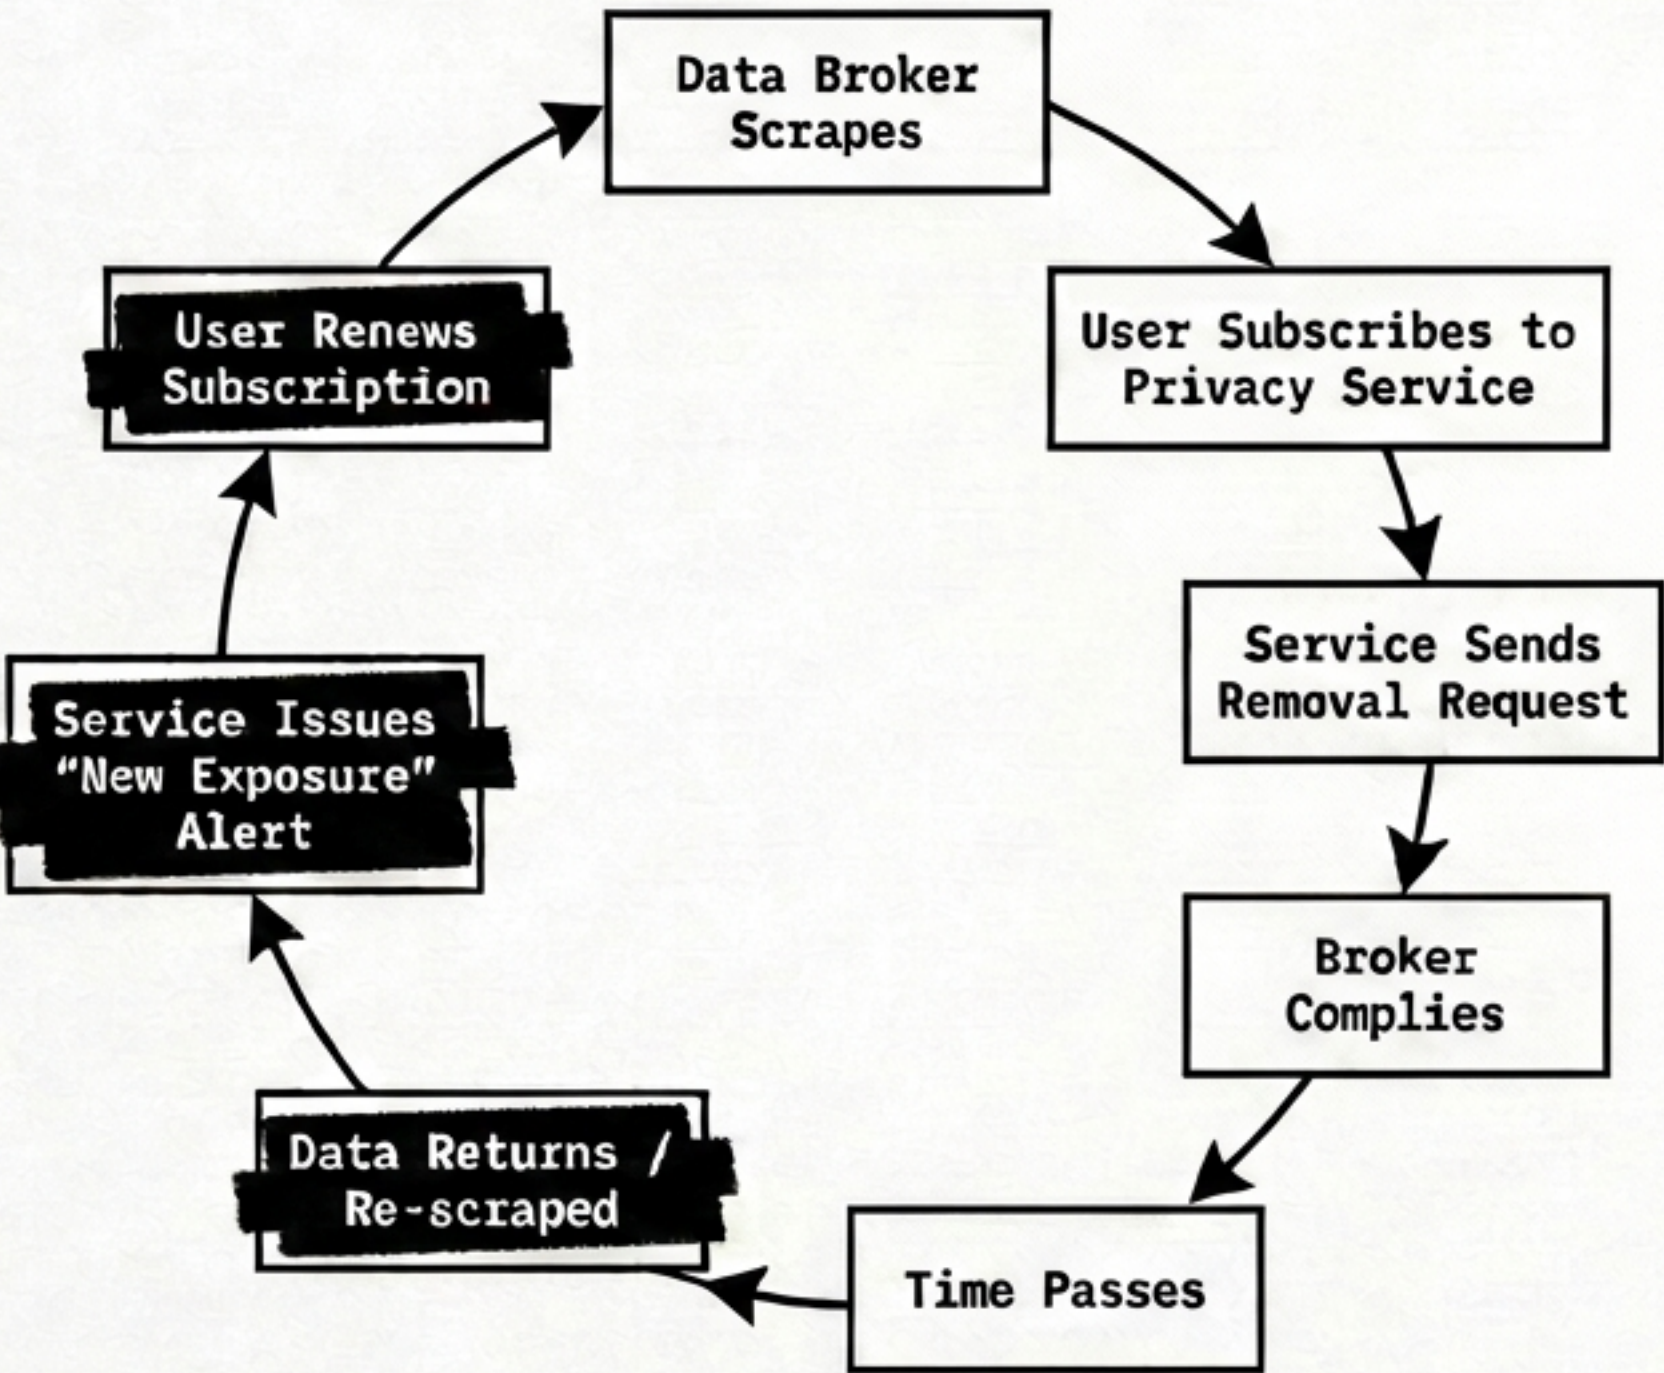

Payload: Court registries, residential
address scraping, historical records,
family associations.

99% USER ABANDONMENT RATE

When users attempt to opt out, brokers deliberately deploy 'weaponized friction'—complex identity verification, physical mail-in forms, confusing UI loops, and ignored emails—designed specifically to force an overwhelming abandonment rate.

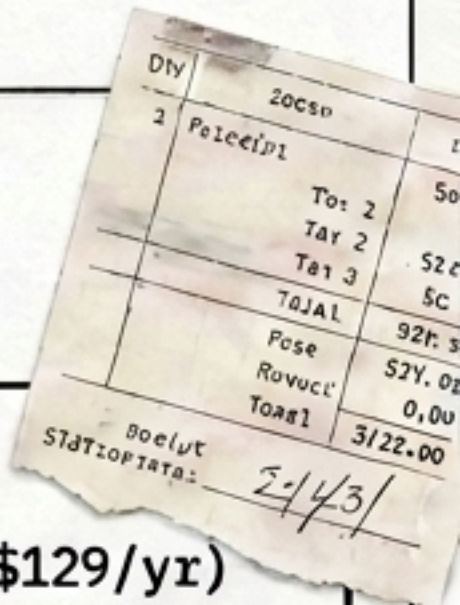

The privacy subscription model is backward. Commercial services charge a lifetime subscription tax to delete data, but because they are passive cloud scrapers, brokers simply re-list your dossier. You rent a service to clean up an ecosystem that keeps recreating the mess.

THE SUBSCRIPTION TRAP LOOP

FINANCIAL AUDIT TABLE
= COMPETITOR PRICING

DeleteMe :	\$10.75/mo (Billed annually at \$129/yr)
Incogni :	\$14.99/mo (Billed annually at ~\$80/yr)
OneRep Pro	\$22.99/mo (Billed annually at \$191.40/yr)
Optery Ultimate:	\$24.99/mo (Billed annually at \$249/yr)
Non-Pursuit :	\$0.00 Lifetime (Open-source, persistent local statutory enforcement)

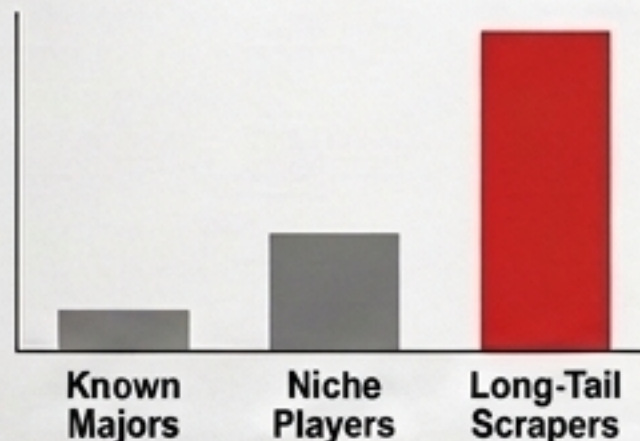

CASE FILE 1: PERSONAL EXPOSURE

WHY IT IS IMPORTANT:
Unchecked exposure leads to identity theft, targeted scams, and reputation damage.

DATA BROKER DISCOVERY

01 LOCAL CLIENT: AUDIT & REMEDIATION

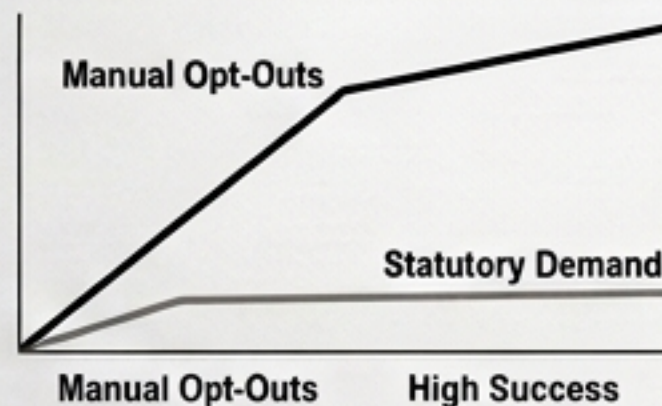

Deploys local-first tools to map exposure and identify hidden brokers for targeting.

CASE FILE 2: OPT-OUT FATIGUE

WHY IT IS IMPORTANT:
Without persistent action, your data will be constantly re-listed, making prior efforts useless.

CUMULATIVE EFFORT vs. SUCCESS

02 STATUTORY DEMAND: LEGAL FORCE

Leverages laws (e.g., CCPA, CPL) to compel action with strict deadlines and penalties.

CASE FILE 3: COMPLIANCE BLINDNESS

WHY IT IS IMPORTANT:
False confirmation of deletion leaves you vulnerable, and brokers face no consequence for non-compliance.

VERIFICATION STATUS

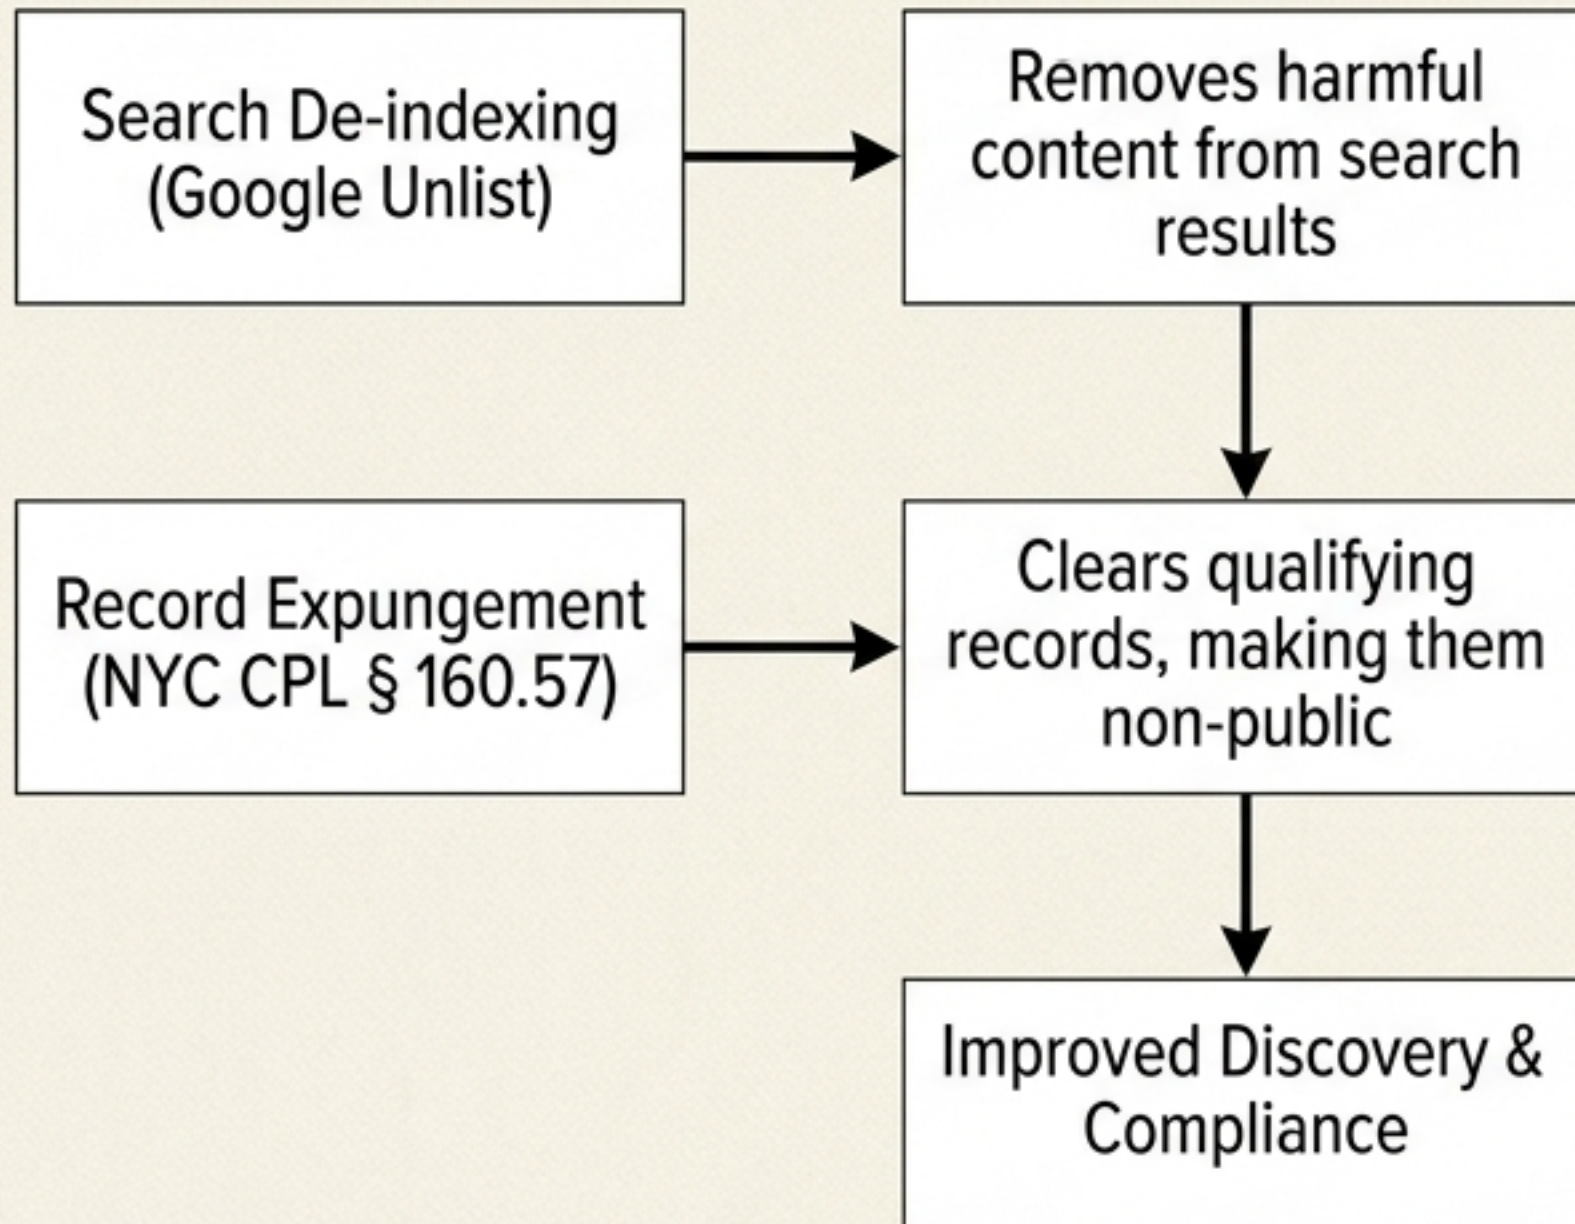

03 EVIDENCE LEDGER: IMMUTABLE PROOF

Creates a persistent, auditable record of requests and failures to enforce compliance.

45
[STATUTORY LEVER]
DAYS

legal briefing

Under California CCPA rules, covered businesses are bound to a 45-day statutory response clock. This timeframe balances individual rights with the reality that businesses, which are groups of people and systems, need reasonable time to process requests. Non-Pursuit turns a vague "intent to delete" into an active.

legal briefing

Effective August 1, 2026.

The state-operated DROP platform legally forces registered data brokers to process automated deletion requests at least every 45 days.

The law is moving toward infrastructure.

The future of privacy is not: "How many companies can I hire to watch the internet?"
It is: "How much of the enforcement process can belong to me?"
